

Intro to DL Y2021 Semester B

Project part 3 checklist

Checklist

1. You will still work with word vectors (aka word embeddings, as described here: <https://machinelearningmastery.com/develop-word-embeddings-python-gensim/>)
2. Read about CNN models in keras at <https://www.tensorflow.org/tutorials/images/cnn> and <https://towardsdatascience.com/building-a-convolutional-neural-network-cnn-in-keras-329fbbadc5f5> . Note that you will use CNN 2D or CNN 1D.
3. Download training and test data from moodle.
4. Write the assignment at colab.
5. Evaluate your solution using the training data.
6. Run your best code on the test data and store it in the required format.
7. Submit your results on kaggle competition site provided in the assignment description.
8. Submit your runnable PYTHON code on moodle.
