Intro to DL Y2021 Semester B

Project part 2 checklist

Checklist

1. Learn how to parse text with nltk package, read about it here:
   https://www.nltk.org/book/ch01.html
2. Install genism package.
3. Read on how to obtain word vectors (aka word embeddings) for words here:
   https://machinelearningmastery.com/develop-word-embeddings-python-gensim/
4. Read about fully connected NN models in keras at
   https://machinelearningmastery.com/binary-classification-tutorial-with-the-keras-deep-learning-library/ and https://keras.io/api/layers/core_layers/dense/
5. Download training and test data from moodle.
6. Write the assignment at colab.
7. Evaluate your solution using the training data.
8. Run your best code on the test data and store it in the required format.
9. Submit your results on kaggle competition site supplied on moodle.
